Introduction
The Problem

Did you ever want to make a list without having or wasting paper and share it with as many people as you want?

Mirac

Introduction
The Solution

ShareList is the answer. You can make lists for absolutely anything and share them with people of your choice!

ShareList

Mirac

Introduction - Market Size

- The website is accessible by anybody
- Shopping lists, goals, milestones and many more things can be created
- Therefore a lot of people fit our target group

Introduction Competition

- Messengers

Elements can not be marked as completed

Made for communication and not lists

- Microsoft ToDo

Similar concept. Sharing does not work that well.

- ShareList is not a new idea but it targets the problems of the competition and that is how it stands out.
