Introduction The Problem

Mirac

Did you ever want to make a list without having or wasting paper and share it with as many people as you want?

Introduction The Solution

Mirac

ShareList is the answer. You can make lists for absolutely anything and share them with people of your choice!

ShareList

5/19

Introduction - Market Size

- The website is accessible by anybody
- Shopping lists, goals, milestones and many more things can be created
- Therefore a lot of people fit our target group

Introduction Competition

- **Messengers**

Elements can not be marked as completed

Made for communication and not lists

- **Microsoft ToDo**

Similar concept. Sharing does not work that well.

- **ShareList** is not a new idea but it targets the problems of the competition and that is how it stands out.
