# Introduction The Problem

**Mirac**

Did you ever want to make a list without having or wasting paper and share it with as many people as you want?

# Introduction The Solution

**Mirac**

ShareList is the answer. You can make lists for absolutely anything and share them with people of your choice!

ShareList

**5/19**

# Introduction - Market Size

- The website is accessible by anybody
- Shopping lists, goals, milestones and many more things can be created
- Therefore a lot of people fit our target group

# Introduction Competition

- **Messengers**

Elements can not be marked as completed

Made for communication and not lists

- **Microsoft ToDo**

Similar concept. Sharing does not work that well.

- **ShareList** is not a new idea but it targets the problems of the competition and that is how it stands out.

Create lists and see already created ones

## Your current Lists

### ShareList

This List is the first official list on ShareList. It serves as list for further developing this Website.

# The Product – Functions

You can invite members to your list

A blue rectangular form titled "Invites" in white text. Below the title is a white input field with the placeholder text "E-Mail". Below the input field is a blue button with the text "Invite User" in white.

and also edit member settings

A blue rectangular area containing three buttons. The first two buttons are blue with white text: "Add Write" and "Remove Write". The third button is red with white text: "Delete User".

# The Product – Functions

You can mark elements as done and incomplete
